

CONCRETE

INDOOR | OUTDOOR COLLECTION 2025

At TGS, we design, manufacture and distribute timeless furnitures. We believe that a good piece of furniture should last the test of time while maintaining it's true character throughout its lifetime. Our original designs are crafted with quality materials by a skillful team with great attention to detail. Craftsmanship is at the heart of our creations. With dedication and passion, we shape each piece of wood into an exquisite work of art, along with other supportive materials to compliment the design. From the graceful curves to the precise joinery, our attention to detail ensures that every aspect of our furniture reflects true mastery.

Centred around aspects of quality and warm materials, alongside form and function, we create collections for every room or space.

TRIAD COLLECTION

The Triad collection brings together elegance and versatility, thoughtfully crafted for both indoor and outdoor living. With concrete, limestone, and reclaimed teak working in balance, each piece offers a refined, sculptural presence. Designed to move seamlessly between open-air and interior settings, the collection creates a cohesive, contemporary character to every space.

Material Icons

You may come across these icons within this catalog.

Natural

The items marked with the **N** icon come without any finishing or protective treatment applied to the surface. A natural finish enhances the inherent beauty of the material but can require more maintenance.

Varnished

The items marked with the **V** icon are finished with varnish.

Our sustainability commitment

We believe that durability and sustainability start with choosing the right quality material, and wooden products are particularly suited for refurbishment.

As a vertically integrated company, we know we are in a unique position to contribute to a sustainable shift in the industry. From design to the sourcing of raw materials, packaging and testing, we pay great attention to environmental protection and consumer safety throughout the product-development process. As a company, we work to minimise waste and close the loop toward circularity. Together with our partners, we strive to do our humble share. Just as society and the industry evolve, so do we. We know there is no finish line in this journey and continue our efforts to constantly improve our products and operations.

DURABILITY BY DESIGN

We pay particular attention to the quality of our products, not only during the development stage, but throughout the entire life cycle. We believe that durability and sustainability start with choosing the right quality material, and wooden products are particularly suited for refurbishment.

THE ORIGIN OF OUR WOOD

The ultimate noble and renewable material, all our wood is sourced from responsibly and carefully managed forests compliant with the EU Timber Regulations and the Forest Law Enforcement, Governance and Trade (FLEGT) Action Plan. In addition, our wood sourced from Indonesia is verified under the Indonesian Timber Legality Assurance System (SVLK).

FOCUS ON QUALITY

Producing furniture and accessories at the highest quality, strength and safety is extremely important to us. Our internal protocols are based on the standards set by ANSI (American National Standards Institute) and BIFMA (North American Business and Institutional Furniture Manufacturers Association). Products also meet specific requirements based around ecological and health regulations such as toxic substance use and flammability.

WASTE REDUCTION AND CIRCULARITY

We want to remain as environmentally friendly as possible, working to reduce waste from the earliest design stage. With this principle, we design to reduce or reuse as much scrap wood as possible. Production waste such as leftover logs, wood and sawdust are reused for other purposes. With full control over the (re)design, production and distribution, refurbishing and recycling processes, we are developing a vision for sustainability based on designing for circularity and lengthening product lifespans.
